Town of Berthoud Landscape Design Guidelines — Sopher Sparn

What is Urban Design ?

Urban design is the process of **designing and shaping the physical features of cities, towns, and villages** and planning for the provision of municipal services to residents and visitors. Although it deals with **issues of a larger scale than architecture**, it cannot be understood as a wholly separated field of research and design, since the quality of one depends on the quality of the other. In fact, it is this very **interdependency**, which has been termed **relational design**.
